Dear Jo:

Please find attached our second quarterly progress report for the project "Alternative Practices for Reducing Pesticide Impacts on Water Quality", Contract #B-81609. We made some significant strides this quarter and feel confident in our pace and keeping with the schedule of accomplishments. For ease of presentation and review, we have reiterated the sections of the Year 1 task orders in small font, followed by the progress for each section and task presented in larger bold font.

We have continued to convene our research team and subgroups of the team in regular planning meetings. As stated in our last report, our dedication to the team approach continues to be highly productive.

Note that we are currently preparing a revised budget to account for some adjustments we are making in how we will be addressing some of our tasks. We hope to have this to you sometime during the week of April 26.

Should you have any questions or comments or need any further information, please do not hesitate to contact me and I will handle them directly or address those issues with my colleagues.

Sincerely,

A handwritten signature in cursive script that reads "Michael N. Oliver".

Michael N. Oliver
